

ECO-DEC

**PCT
PATENT****ECONOMICAL, SIMPLE, SAFE***Machine of 20 litres**Machine of 50 litres**Machine of 150 litres**Machine of 500 litres*

This process allows the distillation of all usual solvents.

The system works with direct heating of waste solvent.

A cast aluminium heating element is fastened under the bottom of the tank (no oil bath).

Cycle after cycle it produces a perfectly pure solvent, ready to be used.

The ECO-DEC recycler eliminates the problem
of storage and removal of solvent waste.
